

## **JSZ** for cutting steel sections

OIL, PETROCHEMICAL AND PIPE FABRICATION INDUSTRIES

## and pipe up to 300mm

**Originally made for use in underground coal mining the JSZ is now used in the Oil & Petrochemical and Pipe Fabrication Industries for cutting steel sections and pipe up to 300mm (12") diameter.**

**The Saw comes complete with a pipe & profile clamp and a blade guide to ensure straight cuts. Using it in a mounted position means there is no hand arm vibration problem. Optional automatic feed facility available on request.**

**This dual speed machine is fitted with automatic lubrication and a trigger lock.**

**Uses Cengar 25mm (1") wide Bi-Metal Saw Blades**
